Child and Adolescent Community Health

CLINICAL PSYCHOLOGISTS IN PRIVATE PRACTICE WORKING WITH CHILDREN

Clinical Psychologists provide counselling services for parents, children and adolescents experiencing difficulty with social, emotional, psychological or behavioural difficulties. When choosing a private clinician, it may be helpful to ask some of the following questions:

- What is your area of specialty?
- What age group do you usually see?
- What is your appointment availability?
- Where will the service be provided; home, school, clinic?
- What programs are offered? Is it on a group or individual basis?
- Will you provide me with a written report?
- What will the appointment cost? Do you bulk bill?
- Are you registered with Medicare/my private health insurer? Can you tell me how much the Medicare/private health rebate is?
